

One Tap. Anywhere Business Happens.

A small tap card or stand for the counter, window, or table — guests tap their phone and land exactly where you want them, no app and no camera fumbling.

Mini Tap is a compact, reusable tap card you keep at the counter, register, table, or window. Point it at whatever matters most right now — booking, reviews, your menu, your loyalty program — and re-point it yourself in seconds whenever priorities change. No design skills, no reprint, no app for your customers to download.

WHERE IT WORKS

Barbershops & Salons • Book the next appointment • Leave a Google review after the cut • Follow the shop's Instagram/portfolio	Cafés & Coffee Shops • Join the WiFi instantly • Open the mobile order & pay app • Sign up for a rewards card
Boutiques & Retail • Browse the online catalog • Join the email list for sale alerts • Check a gift card balance	Gyms & Studios • Claim a free trial class • View the weekly class schedule • Start a membership sign-up
Restaurants & Bars • Pull up the menu, no laminated card needed • Join a waitlist from the sidewalk • Leave feedback before the table turns	Repair & Service Shops • Start a repair request or drop-off form • Check appointment or job status • View warranty or service terms

Where to Put It

Why Tap Beats a QR Code

A QR code asks a customer to open their camera, aim, hold still, and hope it focuses. A tap just works — and it does more than a printed square ever could.

SIDE BY SIDE

Feature	Mini Tap	QR Code
One-motion access	✓ Tap and open	— Open camera, aim, focus
Works in low light / glare	✓ Yes	— Often fails
Update the destination	✓ Reprogram in seconds	— Reprint the code
Feels premium, not spammy	✓ Yes	— Associated with clutter/scams
Works if a customer's camera app is broken/disabled	✓ Yes	— No
Fallback for phones that don't support tap	✓ Printed QR included on every unit	— N/A — it is the QR

HOW IT WORKS

- 1

Order the quantity you need and keep them on hand.
- 2

Tap-write your link with any smartphone — no app required.
- 3

Customers tap, and land exactly where you sent them.
